## INVESTMENT PERFORMANCE

The long-term investment goal of the Plan is to achieve a minimum annualized rate of return of 3.45% in excess of the Canadian Consumer Price Index. To achieve this goal, the Plan has adopted an asset mix that has a bias in favour of equity investments. The responsibility for investing the assets of the Plan has been delegated to three professional investment fund managers with different mandates to ensure adequate investment diversification.

The Plan's Return Benchmark is a performance standard developed by the Plan's Investment Consultant, Aon Hewitt. The Academic Defined Benefit Pension Committee and the Board of Governors have approved the benchmark. The investment fund managers of the Plan are expected to meet or surpass the benchmark.

Investment Performance	2017	Last 4 years	Last 10 years

## A SNAPSHOT OF YOUR PENSION PLAN

You participate in the defined benefit (“DB”) pension plan. When you retire, you receive a set monthly pension payment for the rest of your life.

### WHILE YOU ARE WORKING

### WHEN YOU RETIRE

You receive a **monthly pension**

**How much?**  
It’s based on how long you participated in the plan and how much you earned.

**Your pension is paid for your lifetime.** Plus — there’s an option for your spouse. If you die first, your spouse will continue to receive a portion of your pension benefit.

## GOING-CONCERN FINANCIAL POSITION OF THE PLAN

The financial position of the Plan on a going-concern basis is measured by comparing the market value of assets to the actuarial liabilities assuming the Plan is continuing for the long-term. As requested by the Saskatchewan Superintendent of Pensions, the valuation method has been changed in order to increase transparency in how past and future service deficits are amortized. The new method has been determined to be a more appropriate method in the current environment.

The following table outlines the results of the actuarial valuation performed as at December 31, 2017. Comparative numbers as at December 31, 2016 are also provided.

		2017	2016
 <b>ASSETS</b>	Fund value (net assets available for benefits)	\$184,170,000	\$178,605,000
 <b>LIABILITIES</b>	Present value of accrued benefits for active members	\$55,661,000	\$59,323,000
	Pensioners	\$95,553,000	\$89,245,000
	Temporary pensioners	\$1,411,000	\$2,303,000
	Other members (inactive, deferred, pending transfers)	\$5,632,000	\$5,394,000
	Voluntary and transferred contributions	\$817,000	\$804,000
	Defined contribution account balances	\$331,000	\$345,000
	Transfer deficiency holdbacks	\$5,990,000	\$6,950,000
	Provision for adverse deviation	\$7,914,000	\$7,813,000
	<b>Total actuarial liabilities</b>	<b>\$173,309,000</b>	<b>\$172,177,000</b>
	<b>SURPLUS</b>	<b>\$10,861,000</b>	<b>\$6,428,000</b>

## CONTRIBUTION AND FUNDING REQUIREMENTS

The Plan will file a valuation report with the regulators at December 31, 2017. The Plan revealed a going-concern surplus of \$10,861,000 and therefore no special payments are required.

The actuary has concluded that current contribution rates continue to be less than the benefits currently accruing to members of the Plan. The valuation at December 31, 2017 revealed a current service cost deficiency of 7.17% of pensionable earnings. However, surplus assets are sufficient to cover this deficiency; therefore, no additional contributions are required to be made to the Plan.

## HYPOTHETICAL WIND-UP POSITION OF THE PLAN

The Pension Benefits Act (Saskatchewan) requires the University to review whether the assets of the Plan would be sufficient to cover the liabilities of the Plan in the event of a plan wind-up. The following table outlines the wind-up position of the plan at December 31, 2017.

	2017	2016
Actuarial value of assets	\$183,970,000	\$178,405,000
Actuarial liability	\$211,845,000	\$211,638,000
Surplus (Deficit)	\$(27,875,000)	\$(33,233,000)
Solvency ratio(assets/liabilities)	87%	84%
Special Payments Required*	—	—

\*The Plan has been classified as a "Specified Plan" and is not required to fund solvency deficiencies.

## TRANSFER DEFICIENCY REQUIREMENTS

As the Plan has a solvency ratio of 87% (determined in the last filed valuation at December 31, 2017), it is necessary to withhold 13% of any lump-sum payments. The amount withheld, referred to as the “transfer deficiency”, will be paid out with interest at the end of the five-year period following the date of original pay-out (or earlier in the event of plan surplus). This provision does not impact members retiring and commencing a pension from the Plan.

### TRANSFER DEFICIENCY PAYOUT EXAMPLE

Applies to individuals who terminate employment and elect to transfer the lump sum value of their entitlement out of the Plan.
