The long-term investment goal of the Plan is to achieve an annualized total rate of return of a least 3.10%. To achieve this goal, the Plan has adopted an asset mix that has a bias in favour of fixed income investments, and uses a custom liability matching bond strategy. The Plan's asset mix is designed to be 70% custom bonds and 30% equities.

The responsibility for investing the assets of the Plan has been delegated to two professional investment fund managers with different mandates to ensure adequate investment diversification.
